

Federal Communications Commision;

Dear persons

I am verry unhappy to learn that the FCC is trying lessen the Telephone Privacy law that Indiana has in place. For years I had to put up with annoying telemarketing call. They always came at inconvient times, like when you sit down at the tabel to eat and at the crutial sopt in a TV show when you are tying to relax. Or at times when you have company visiting. Findly I got on Indiana's no call list and the sales calls have become so infrequent that I can not remember the one before. INDIANA's TELEPHONE PRIVACY LAW WORKS. I can testify to it. It ha improved my tome at home and time with my family. I urge you ( the FCC ) to NOT implement any rulling that would could posibly change what is working very well. If the FCC has to make a some rulling, then just require that ALL state have a "NO CALL" regulation. But leave it up to each State to implement the law the way they so chose. I do nopt want the FCC to fource Indiana to have to change what is inplace and working well. Thank You for the chanct to voice my views. Roger Tinti, conserved Indiana resedent and tax payer.
